

TWO EXAMPLES OF CONVERGENCE TO THE BURGERS EQUATION

Expositor: Gregorio Moreno Flores (PUC - Chile, grmoreno@mat.uc.cl)

Autor/es: Gregorio Moreno Flores (PUC - Chile, grmoreno@mat.uc.cl); Milton Jara (IMPA, mjara@impa.br)

We consider the stationary Sasamoto-Spohn model and the stationary semi-continuous directed polymer in a Brownian environment. In both cases, we show convergence of the fluctuation field to the energy solution of Burgers equation in an appropriate regime.

This is joint work with Milton Jara (IMPA).
